

## Why the Coronavirus Hoax is a Hoax

Dr Vernon Coleman MB ChB DSc FRSA

From: <http://www.vernoncoleman.com/leaflettoprint.htm>

I can demolish the whole coronavirus nonsense in less than three minutes. Everything in this list can be verified.

1. Many doctors, including Dr Fauci, the American coronavirus supremo, have admitted that the risk of dying of the coronavirus may be similar to the risk with the flu.
2. The flu can kill 650,000 people a year around the world. Even though governments everywhere have admitted fiddling their totals, the covid-19 death total is only now approaching the global flu total.
3. Here's how they fiddled the figures. In the UK, for example, anyone who tested positive for the coronavirus and subsequently died, was officially a covid-19 death – whatever else they had wrong with them.
4. The vast majority of those dying of the coronavirus were over 80 and had many other health problems. The risk for fit, young individuals is very small. The risk for children is smaller than the risk of being hit by lightning.
5. Research has shown that masks are dangerous, don't prevent the spread of infection and almost certainly do more harm than good. The virus can go straight through the material of a mask. And mask wearing affects blood oxygen levels. At least two people have died through wearing masks. I've quoted figures and papers on my website [www.vernoncoleman.com](http://www.vernoncoleman.com) and in other videos on YouTube.
6. Many of those promoting the coronavirus horror story are linked in some way to the vaccine industry or the Bill and Melinda Gates Foundation – which itself has strong financial links to the vaccine industry. For example, the Chief Scientific Advisor in the UK was formerly a senior executive at GSK – one of the big vaccine makers.
7. The British Government has admitted that at least four times as many people have died as a result of the lockdowns and other control measures as will have died from the coronavirus. The remedy has been much deadlier than the disease. Millions are waiting for cancer tests and treatment because hospitals were closed. And some hospital departments in the UK are still closed.
8. Neil Ferguson, the man whose predictions led to the lockdowns had produced a number of inaccurate predictions before he made wildly pessimistic predictions about the coronavirus. His track record is appalling. The college where he works has financial links to the Bill and Melinda Gates Foundation and vaccines.
9. Exactly the same mistakes have been made in almost every country in the world. For example, sick old people were taken out of hospital and dumped in care homes – resulting in tens of thousands of deaths in each country. That couldn't be a coincidence – so it had to be a plan. If you remove the care home deaths from the UK total you end up with a maximum of around 20,000 deaths (though that is a massive exaggeration because they included flu and anyone who tested positive) which is much smaller than the annual flu death total.
10. The number of people who have caught the coronavirus worldwide is now said to be around 10 million. But the flu can affect 1 billion in a single year.

These are facts which cannot be disputed, though they are being suppressed. Show the list to doubters. I find it difficult to believe that anyone would still want to wear a mask once they are aware of these simple facts.
